SANCERRE HISTORY

Until the 20th century, the Loire was an important trade route, especially for the transport of wine. Overlooking the Loire, the Sancerre peak watches over the ford which made it possible to pass the Loire River before bridges were built and the city of Sancerre was therefore at a strategic crossroads

between Berry in the West, Burgundy in the East, Champagne in the North East, Paris in the North and Auvergne in the South. Though boasting a long history of wine production, Sancerre was granted AOC status in 1936 and ever since has been renowned for its classic style of Sauvignon Blanc.
