

Long before 'organic' became mainstream Ivor and Susie were pioneering organic cider and Perry making from their home in Herefordshire. The decision to make organic cider was driven by their love for nature – they believed in looking after the countryside and working in harmony with nature. 39 years later the Soil Association organic values remain at the heart of our cider making. We nurture our orchards and over the years as new trees have been planted acting as sanctuaries for wildlife, the eco system has thrived.

DUNKERTONS
ORGANIC CIDER

Black Fox Medium Dry Organic Cider NV

The red fox is a common sight, but folklore told of a fox as black as night that could live in a man's shadow and so never be seen or caught. The Black Fox's favorite haunt was... our cider orchards. Award winning Black Fox is hand crafted with up to 14 carefully blended cider apple varieties to deliver a deliciously rounded cider with a lively tangy finish and light honey hues.

Dry Organic Cider NV

Dry by name and Dry by nature, this cider is one for the more adventurous enthusiast! The leopard is Susie Dunkertons family crest with the apple added for humorous twist. Hand crafted with up to 14 carefully blended cider apple varieties with lower levels of sweetness, the result is a beautifully crisp full bodied cider which is lightly carbonated to deliver a refreshing dry finish.

Organic Perry (Pear) NV

Launched to celebrate the magnificent Perry pear. Although Perry pear trees are relatively uncommon, those who mastered a Perry were held in high esteem. In years gone by demand was so high that farm workers requested part of their wages in Perry. Our Perry has a distinctive Perry pear fragrance with a delicate creamy flavor perfectly balancing initial sweetness with a dry finish.

Breakwells Seedling Medium Dry Organic Cider NV

A fragrant and fruity sparkling medium dry cider made exclusively from the Breakwells Seedling apple. This apple was first discovered over a century ago at Perthyre Farm, Monmouth. Because of its delicious flavor, farmer George Breakwell propagated the seedling and it was later planted in many Herefordshire orchards, including our own.
