

Bodegas Volver celebrates traditional Spanish wine culture by showcasing its variety, depth and unique terroirs. We concentrate on cultivating Spanish indigenous varieties such as Monastrell, Tempranillo, Garnacha Tintorera, Merseguera, Macabeo and Moscatel from the regions of La Mancha, Alicante, Valencia, Jumilla and Almansa – each wine telling the unique story of these regions.

LA MANCHA

The high altitude arid plains of La Mancha have a continental climate – cold, snowy winters, drenched with sunlight and drastic diurnal summer temperatures with nearly zero precipitation. The soils are very sandy and are intermixed with pure chalk and red clay, evening out the precious moisture for the vines. These harsh conditions result in rich red wines.

ALICANTE

A slightly tempered Continental climate with Mediterranean influences. Winters are cold, with snow in the higher elevations. The soil is dry and shallow, and is primarily composed of limestone, which is the mother rock. The soil is intermixed with large chunks of pure chalk. The largest marble quarry in Europe is located near our vineyards, testament to the chalky quality of the soils. Marble is the product of chalk, or calcium carbonate, that has been compressed over a very long period of time.
