NOTES

vines are farmed with a focus on sustainability, minimizing tractor use to reduce carbon impact while relying primarily on manual vineyard work. Yields are carefully managed at an average of 50 hl/hectare.

Winemaking: The wine undergoes a traditional semi-carbonic maceration with an immersed cap ("grillage"). Fermentation temperatures are 77-90°F (25-32°C) for approximately 11 days, maximizing color, aroma, and gentle tannin extraction. Following fermentation, the wine is aged primarily in stainless steel tanks, with 5% matured in oak vats, including a portion in new barrels.

With a deep red color, this Fleurie offers the classic characteristics of fresh red berries. Thanks to the delicate but identifiable tannins, this wine has good structure as well as great aromatic complexity.
